Filtr pomarańczowy Explore Scientific N21 1,25"

Cena	64,95 zł
Numer katalogowy	74786
Kod producenta	74786
Kod EAN	0753215772575

Opis produktu

Filtr pomarańczowy Explore Scientific N21 1,25" Do prowadzenia szczegółowych obserwacji planet. Średnica: 1,25" This one really supports the detection of the dark areas on the planet Mars. The details of the clouds of Saturn and Jupiter are also so much more visible through the Filter. Color Filters darken the light slightly, that reaches the eye or the sensor of the camera. This eliminates for instance stronger transitions. The result is that your picture turns out with more contrast which automatically shows more details. Features: Made from high-quality optical glass Filter glass is absolutely parallel All optical surfaces have anti reflex coatings Filter housing from black anodized aluminum Filter threads on both ends (female/male) Multiple filters usage is possible The kit includes: Color filter Protection-case Specifications: Type: color filter Optics material: optical glass Optics coating: multicoated, anti-reflective Body: aluminium Eyepiece barrel diameter: 1,25"(31.7mm)
