Latarka Explore Scientific, czerwona

Cena	64,95 zł
Numer katalogowy	73039
Kod producenta	73039
Kod EAN	0643824215726
Producent	Explore Scientific

Opis produktu

Latarka Explore Scientific, czerwona Kieszonkowa latarka LED The Explore Scientific red light flashlight is the ideal companion at night to read star charts or make adjustments to the equipment without losing the dark adaptation of the eyes. The flashlight offers 3 functions: continuous light bright, continuous light dark, flashing. The large diffusing lens results in a very large and evenly illuminated light cone, which can also be adjusted by a sliding mechanism. By using a power-saving LED lamp, the battery life (1 AA/LR6) is up to 100 hours. Of course, the robust lamp housing made of aluminium is splash-proof according to IPX4 and therefore particularly well suited for outdoor applications. The side cutouts on the front of the flashlight provide a 360° signal function. The 50cm long carrying strap with quick coupling and an extra belt clip included in the scope of delivery ensure that the flashlight is always quickly at hand. The Explore Scientific red light flashlight should not be missing in any equipment. Features: Red light flashlight Reading star maps at night Dark adaptation of the eyes is retained 3 functions: continuous light bright, continuous light dark, flashing 360° signal function Large diffusing lens produces a uniformly illuminated light cone Carrying strap and belt clip included Battery life up to 100 hours (1 AA/LR6 battery) Splash-proof according to IPX4 Robust lamp housing made of aluminium The kit includes: Red light flashlight Carrying strap Belt clip Battery (1 AA/LR6) Specifications: Material: aluminium Lighting: LED, red light Functions: continuous light bright continuous light dark flashing Waterproof: splash-proof according to IPX4 Power source: 1 AA/LR6 battery
