Levenhuk M20 Large Planisphere

Cena	39,95 zł
Dostępność	Dostępność - 3 dni
Numer katalogowy	60876
Kod producenta	60876
Kod EAN	0611901506753

Opis produktu

A planisphere is a rotating star chart that quickly and easily helps you find out which celestial objects may be observed at your location, at a given date and time. While observing the night sky, our ancestors noticed that it constantly changes throughout the year. Due to the rotation of our planet (around the Sun and around its own axis), what we see on the celestial sphere varies as months go by, and even during the day! This realization led to the creation of a planisphere that allows people to locate the brightest astronomical objects at a specific date and time in future (or past) observations.
