Levenhuk Strike 1000 PRO Telescope

Cena	2 499,95 zł
Numer katalogowy	65577
Kod producenta	65577
Kod EAN	0611901509419

Opis produktu

Levenhuk Strike 1000 PRO is the most advanced model in the Strike PRO series for advanced astronomers. It performs well both during planetary observations and study of deep-sky objects. Its 102-millimeter (4-inch) objective lens gathers so much light - 28% more than a 90-mm (3.5-in) objective lens, to be precise - that you can observe stars up to 12.0 stellar magnitude. That means you can study distant galaxies, nebulae, star clusters and so much more. Its focal length of 1300 millimeters (51.2 inches) provides very detailed views of planetary surfaces. But it is still a compact and lightweight model that you can easily carry to the countryside to enjoy the clear starry sky.
