Stacja meteorologiczna Bresser 5-in-1 Wi-Fi z kolorowym wyświetlaczem

Cena	659,95 zł
Numer katalogowy	73261
Kod producenta	73261
Kod EAN	0643824211599
Producent	Bresser

Opis produktu

Stacja meteorologiczna Bresser 5-in-1 Wi-Fi z kolorowym wyświetlaczem Compact weather station with colorful display and Wi-Fi Bresser 5-in-1 Wi-Fi Weather Station with Color Display offers comprehensive information service despite its compact design. The multifunctional professional outdoor sensor can be easily installed with the supplied mounting accessories! The professional outdoor sensor transmits measured values for wind speed, wind direction, air humidity, temperature, and rainfall at 868 MHz frequency to the base station. On the clearly structured 5.7" color display of the base station, you can read not only these values, but also the recorded data. The latter allows the internal storage and evaluation of the measured data over a 24 hour period. From the collected measurement data, the weather station calculates a very reliable local weather trend forecast for the next 12 hours, which is shown on the display in graphical symbols. The Wi-Fi feature allows you to use apps like "Weather Underground", "Weather Cloud", "PWS Weather", or "Weather WOW" to share local data. For maximum and minimum values, an alarm can be individually programmed, which triggers both an acoustic and a light signal when the specified value is reached. For outside temperatures above -3°C, a special alarm for frost/ice warning can also be activated. Bad indoor climate often presents risks for health, especially for children and the elderly people. This weather station also offers a smart feature here. The room climate indicator always informs about the room climate with a symbol. Different moon phases are also displayed. An alarm function with snooze function is included. Features: 5.7" colorful display for time and detailed weather information Wi-Fi connection with Internet time synchronization Receives weather data from 5-in-1 profi sensor and from wireless thermo-hygro sensor via 868/915/917 MHz transmission Publishes local weather station data on weather underground, weather cloud, PWS Weather and WOW platform Displays time, calendar, weekday, and moon phase Alarm clock Ice pre-alert function Indoor temperature (°C/°F) and humidity with comfort indication Outdoor/Channel's temperature (°C/°F) and humidity readings Gust or average wind speed Wind direction (16-direction indicator) Rain rate (hourly, daily, weekly, monthly, total rainfall) Weather forecast (sunny, partly cloudy, cloudy, rainy, stormy, snowy) Barometric pressure in relative or absolute readings (hPa, inHg, mmHg) Smart outdoor "Feels like" sensation reading Weather index for outdoor feels like, dew-point, Wind chill, Heat index Max/Min memory records and past 24 hours (hourly record) High/Low alert with flash LED indicator Weather calibration (on set-up UI) 3-mode brightness: High/Low/Off 7 languages for weekday (EN/DE/FR/ES/IT/NL/RU) Support firmware update (TBC) Support a wireless 5-in-1 professional weather sensor (w zestawie) Support up to 7 pcs wireless extra sensors (Optional) The kit includes: Main unit Professional 5-in-1 sensor including mounting material 100-240V/50 Hz power adapter and cable
