## Opis produktu

Stacja meteorologiczna Bresser 5-in-1 z kolorowym wyświetlaczem, czarna Compact weather station with colorful display The new Bresser Weather Center 5-in-1 COLOR combines a compact design with an extensive information service in a very unique way. The small-sized multifunctional outdoor sensor is very place-saving and can be placed almost anywhere. A pipe clamp and screws to mount it to a pole (tube diameter about 25-33mm) as well as a stand are already included! The 5-in-1 outdoor sensor reliably transfers the measured values for wind speed, wind direction, humidity, temperature and precipitation amount to the main station. On the clearly structured display of the main station, not only current values but also numerous historical data can be displayed. This allows for the internal saving and evaluation of the measured values over a period of 24 hours. From the collected data, the weather station determines a very reliable local weather trend forecast for the next 12 hours, which is displayed on the screen by 6 graphical symbols. For the maximum and minimum values, an individual alert can be programmed that gives both an acoustical as well as a light signal when the predetermined value is reached. For outdoor temperatures below -3°C a specific alert can be activated as frost/ice warning. A bad room climate often carries a health risk particularly for children and the elderly. The Bresser 5-in-1 weather center provides a smart solution. The room climate indicator informs by means of symbols about the room climate. Furthermore, the Bresser weather center 5-in-1 disposes of a radio-controlled time and date setting (DCF time signal). Just a few minutes after switching on the weather station the current Central European Time and the date with weekday are automatically set. An alarm clock with a snooze function are also part of the scope of features. A new feature of this weather center is the color change of the display when the outdoor temperature changes. Therefore, one can easily see from the color of the display if it's weather for a jacket or a t-shirt. Powered by 3x AA batteries (nieuwzględnione). Features: Changing display color when temperature changes 8 display colors can be set manually 256 colors in the automatic mode 5-in-1 multifunctional outdoor sensor Mounting accessories for the sensor included Indoor/outdoor temperature (°C/°F) and humidity Wind direction and speed Graphical weather trend (12 hours) Precipitation with history (day/week/month) Atmospheric pressure with history (24 hours) Heat index Dew point Radio controlled time and date setting Clock alarm Ice/frost warning Minimum/maximum memory (up to 24 hours) LED background light, BTN color display The kit includes: Main station with stand 5-in-1 outdoor sensor with mounting accessories User manual Dane techniczne: Zastosowanie: pomiar ciśnienia powietrza, pomiar opadów, alarm temperatury, pomiar temperatury, budzik, prognoza pogody, pomiar wiatru, informacje o czasie Konstrukcja: cyfrowa, mocowana do ściany, stołowa Pora roku: wiosna, lato, jesień, zimy Wyświetlanie czasu / daty: 12-godzinny, 24-godzinny; bieżąca data, wyświetlanie w dni powszednie Języki: Niemiecki, Angielski, Francuski, Włoski, Hiszpański Wyświetlacz temperatury: wewnątrz/na zewnątrz Pomiar wiatru: prędkość i kierunek wiatru Szansa na deszcz: tak Trend pogodowy: tak Prognoza pogody: 12-godzinna prognoza Zasilanie: 3x AA (LR6), 1.5V (nieuwzględnione) Częstotliwość sygnału radiowego: 868 MHz Promień sygnału radiowego: 30 m Barwa: czarny Korpus: tworzywo sztuczne Wymiary: 167x25x135 mm Masa (bez akcesoriów): 344 g Masa (z akcesoriami): 1297 g
