Opis produktu

Wykrywacz metalu DMAX Easy Search Field of application: coins, relics, jewellery The DMAX metal detector Easy Search offers two different methods to you for detection of iron, copper and silver. The LCD screen is equipped with a two-color LED to display iron and non-ferrous metals. The differentiation of metals takes place by three different sound signals. The metal detector Easy Search detects objects of the size of a coin in a depth of up to 16cm. Larger metallic objects can also be detected in deeper layers. In addition, the battery level is displayed and on the back of the screen is a headphone jack. Due to the adjustable S-rod shaft length and the arm support, the metal detector Easy Search can be customized for a comfortable use. The DISC method makes it possible to eliminate unwanted metals and the ALL METAL method displays all metals. Features: Two operating modes: ALL METAL (find all kinds of metal) DISC (eliminate unwanted objects from detection) LCD screen The LCD screen shows sensitivity and metal type Three tones to indicate different types of metal Sensitivity >16cm (e.g. for a coin) Automatic ground balance 8.5" waterproof search coil Speaker and headphone jack One 9V alkaline battery required
