Opis produktu

Zestaw filtrów Explore Scientific N3 Zestaw zawiera 4 kolorowych filtrów do obserwacji Księżyca i planetExplore Scientific Filter Set N3 is recommended for Moon and planets from 150mm (6") aperture.Set N3 includes the following filters:Explore Scientific Filter 1.25" Light Blue No.82A The color of light blue really supports watching the high clouds on Mars. The contrast increases. The dark red structures will be shown even darker, so this is the perfect filter for watching the big red Flecks on the gas planet Jupiter. The rings of Saturn will be accentuated, the structures of the Venus Atmosphere will be even finer.Explore Scientific Filter 1.25" Violet No.47 The purple filter is perfect for watching Venus. Seeing through it, the dark clouds of the Venus atmosphere become even better visible. He also clears up the structures of the rings around Saturn. Using big openings and having a clear sight this filter is also good for watching Merkur.Explore Scientific Filter 1.25" Light Red No.23A The blue/blue green light is totally blocked. The contrast between the card and the lighter zones will enormously increase. This is truly helpful when you watch Jupiter or Saturn. Or for mars, watching the poles.Explore Scientific Filter 1.25" Yellow-Green No.11 Watching the Moon surface through the filter, the contrasts will enormously increase. Same with planet Mars. On the huge planet Jupiter, when using the filter, you can even see the contrasts between the cloud-bands and a lot more details. Starting with a telescope diameter of 8" and a clear sight, you even get to see various details of Saturn.What ist a color Filter for and do we really need it?Color Filters darken the light slightly, that reaches the eye or the sensor of the camera. This eliminates for instance stronger transitions. The result is that your picture turns out with more contrast which automatically shows more details.Features: Made from high-quality optical glass Filter glass is absolutely parallel All optical surfaces have anti reflex coatings Filter housing from black anodized aluminum Filter threads on both ends (female/male) Multiple filters usage is possibleThe kit includes: 4pcs color filter 4pcs protection-case
